I am writing to apply for the HR Manager (m/w/d) position at FCF Fox Corporate Finance GmbH. While my professional background is in software engineering, I bring a strong foundation in process automation, workflow optimization, and system implementation that directly supports the HR digitalization goals outlined in your description.

One area that particularly interests me is the focus on advancing HR digitalization, including the optimization of Personio, automation of HR processes, and introduction of digital workflows. Through my work building full-stack applications, I have designed and implemented automated systems using Cron job scheduling, integrated third-party services, and developed real-time monitoring dashboards. These experiences have given me a practical understanding of how to streamline operations, reduce manual effort, and improve data accuracy through technology.

A relevant example is a real-time server health monitoring system I built, which tracks system metrics and streams live data to a dashboard. This project required designing automated workflows, managing data pipelines, and ensuring reliable system performance. The same structured, solution-oriented approach applies directly to building and maintaining HR reporting systems, automating onboarding and offboarding processes, and managing HR KPIs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my ability to drive process improvements, take ownership of projects, and work independently aligns well with the responsibilities of this role. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to FCF’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
