I am writing to apply for the Pflichtpraktikum (unbezahlt) Femtec Startup position at Femlives. As a software engineering student with hands-on project experience, I am eager to contribute to a growing startup and learn from direct involvement in daily operations.

Through my academic and project work, I have developed strong organizational and communication skills. I have coordinated tasks across multiple teams, managed project timelines, and maintained clear documentation. I am comfortable working with tools like Notion for project organization and am motivated to learn video editing and content creation with Canva.

One area that particularly interests me is the opportunity to support communication with healthcare professionals. I have experience coordinating with stakeholders and ensuring smooth information flow in previous collaborative projects. I am confident I can help manage these interactions effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to take responsibility, learn quickly, and contribute from day one. I have attached my CV for your review and look forward to the possibility of joining Femlives.

Sincerely,

Md Shahanur Islam Shagor
