I am writing to apply for the Projektleiter Elektrotechnik position at TechPlanen. Your focus on planning industrial energy systems and coordinating technical projects aligns with my experience in system design, documentation, and cross-functional collaboration.

Through my professional experience, I have developed strong organizational and coordination skills while managing technical projects from planning through delivery. I am comfortable working independently, taking ownership of technical documentation, and ensuring clear communication across teams. These abilities directly support the responsibilities outlined in this role, including technical planning, cost oversight, and interface coordination.

One area that particularly interests me is the opportunity to work on energy concepts and technical calculations within a structured engineering environment. My background in software engineering has given me a methodical approach to problem-solving, technical analysis, and documentation, which I believe translates well into electrical engineering project management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination and technical planning experience can contribute to TechPlanen’s team.

Sincerely,

Md Shahanur Islam Shagor
