I am writing to apply for the Senior Project Manager (all genders) - Event position at LIGANOVA GmbH. Your focus on creating immersive live experiences and your commitment to diversity and sustainability align with how I approach complex, collaborative work.

Although my professional background is in software engineering, my day-to-day work has always been deeply rooted in project management. Over the past four years, I have led full-cycle development projects that required careful planning, budget tracking, cross-team coordination, and stakeholder communication. I am used to managing competing priorities and ensuring that every phase of a project, from initial concept to final delivery, stays on schedule and within scope.

In my role at Explo-IT, I was responsible for coordinating internal developers, external API providers, and third-party service vendors. I handled requirement gathering, timeline estimation, resource allocation, and progress reporting. I also managed client expectations directly, translating technical constraints into clear business language. This experience has given me strong skills in negotiation, presentation, and cross-functional collaboration.

In addition to my technical and project coordination experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can bring structured project execution, clear communication, and a collaborative mindset to your team. My CV is attached for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
