I am writing to apply for the Amazon Brand Manager (m/w/d) - Fokus PPC position at Obics GmbH. Your description of a growing e-commerce company with multiple established brands and a seven-figure Amazon revenue caught my attention, particularly the emphasis on ownership, strategic thinking, and direct collaboration with founders.

My background is in software engineering, where I have developed strong analytical and data-driven problem-solving skills. Through full-stack development projects, I have worked extensively with data analysis, KPI tracking, and optimization workflows. I am comfortable working with tools like Excel and Google Sheets for data analysis and reporting, and I have experience with database querying and data manipulation using MySQL and PostgreSQL.

What stands out to me about this role is the opportunity to take ownership of the entire P&L channel and drive measurable growth. While my direct experience is in technical development rather than Amazon PPC management, I am a quick learner who adapts rapidly to new domains. I am confident I can quickly master Amazon Seller Central, PPC campaign management tools like Helium 10 and Sellerboard, and apply my analytical mindset to optimize advertising performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and rapid learning ability can contribute to scaling your Amazon business.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
