I am writing to apply for the Specialist Health & Safety position at Ruby GmbH. Your focus on creating safe, well-maintained environments across a growing international hotel portfolio is something I find genuinely compelling.

My professional background is in software engineering, where I have developed strong skills in documentation, process coordination, and cross-team communication. In my role as a Web Developer at Explo-IT, I was responsible for creating clear technical documentation, coordinating feature delivery with stakeholders, and ensuring that all work met defined quality and compliance standards. These experiences have given me a structured, detail-oriented approach to managing complex workflows.

One area that particularly interests me is the coordination of safety documentation and risk assessments. In my previous work, I regularly maintained detailed records, tracked action items, and followed up on agreed measures with multiple teams. I am confident that this systematic approach translates well to supporting hazard assessments, updating safety documentation, and coordinating training sessions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Ruby’s Health & Safety team.

Sincerely,

Md Shahanur Islam Shagor
