I am writing to apply for the Junior Accountant/Buchhalter position at Sancovia Gruppe. Your firm's reputation as a leading M&A and corporate finance group in the DACH region is impressive, and I am interested in contributing to your finance operations in Dˆ…sseldorf.

Although my professional background is in software engineering, I have developed strong analytical and data management skills that are directly applicable to accounting work. In my previous roles, I worked extensively with relational databases including MySQL and PostgreSQL, where I was responsible for data entry, reconciliation, querying, and generating structured reports. These tasks required the same precision, attention to detail, and systematic approach that accounting demands.

I am comfortable working with numbers, spreadsheets, and financial data. I have experience building reporting dashboards and automating data workflows, which aligns with your goal of optimizing and digitalizing accounting processes. I am a quick learner and can adapt to new software systems like Microsoft Dynamics 365 Business Central efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my structured work ethic and analytical skills to support your accounting team. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to Sancovia Gruppe.

Sincerely,

Md Shahanur Islam Shagor
