I am writing to apply for the Mitarbeiter Finanzbuchhaltung & HR-Administration position at the technology company represented by CUSTOM CAREERS FACTORY GmbH. The combination of accounting responsibilities and HR administration within a mid-sized, technically focused organization is particularly interesting to me.

My background is in software engineering, where I have developed strong analytical and data management skills. I have worked extensively with databases such as MySQL and PostgreSQL, designing schemas, writing optimized queries, and ensuring data integrity. This experience has given me a structured, detail-oriented approach to handling financial and operational data.

In previous professional roles, I was responsible for building and maintaining systems that required careful documentation, secure data handling, and process optimization. I implemented authentication and role-based access control, managed digital records, and supported workflow improvements. These responsibilities align well with tasks like auditing financial transactions, managing digital documents, and supporting HR administration.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, attention to detail, and experience with structured data management would allow me to contribute effectively to the accounting and HR functions. I have attached my CV for your review and look forward to the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
