I am writing to apply for the Working Student - Compliance position at Wolt. The opportunity to contribute to a critical compliance initiative within a global tech company that operates under a regulated E-Money license is genuinely interesting to me. I am eager to gain practical insight into KYC/KYB processes and partner data management in a real-world, high-growth environment.

In my previous professional experience as a Web Developer, I worked on projects that required clear communication with stakeholders and meticulous attention to detail. I am accustomed to managing tasks independently, tracking progress, and ensuring that documentation is accurate and up to date. These skills translate directly to the structured case and lead management required in this compliance role.

I am a current Software Engineering student, which has equipped me with a logical and systematic approach to problem-solving. I am comfortable with active outreach, explaining processes clearly, and following up persistently to ensure tasks are completed. I am looking for a role where I can apply my organizational skills and learn about regulatory operations in a fast-moving company like Wolt.

In addition to my technical background, I work effectively across teams and communicate clearly with diverse stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am available for 20 hours per week and can adapt my schedule to fit university commitments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the compliance team at Wolt. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
