I am writing to apply for the Spezialist Recruiting (m/w/d) position at visionm GmbH. While my professional background is in software engineering, I bring transferable skills in communication, process management, and data analysis that align well with the responsibilities of this recruiting role.

Through my experience as a Web Developer, I have worked closely with cross-functional teams, coordinated project requirements, and maintained clear communication between technical and non-technical stakeholders. This has given me a structured approach to managing workflows, tracking progress, and ensuring alignment across different departments.

One area that particularly interests me is the use of data to drive decisions. In my development work, I have regularly evaluated metrics to identify bottlenecks and optimize processes. I see a direct connection to the recruiting metrics and data-based optimization mentioned in the job description.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my organizational skills, analytical mindset, and ability to work in structured environments would allow me to contribute effectively to your team. I have attached my CV for your review and look forward to the opportunity to discuss how I can support visionm GmbH’s recruiting efforts.

Sincerely,

Md Shahanur Islam Shagor
