I am writing to apply for the Talent Acquisition Manager Corporate Functions (m/w/d) position at visionm GmbH. Your client's focus on structured, process-oriented environments and long-term team development aligns with my own approach to work.

Although my professional background is in software engineering, I have developed transferable skills that are directly relevant to this role. Through years of cross-functional collaboration, I have learned to communicate clearly with stakeholders, manage expectations, and maintain organized workflows. I am fluent in English and have working knowledge of German, enabling me to operate effectively in bilingual corporate settings.

One area that particularly interests me is the end-to-end ownership of recruiting processes described in the job posting. In my previous work, I took full responsibility for project delivery from initial requirement gathering through deployment and maintenance. This experience has taught me to be reliable, proactive, and detail-oriented, qualities that are essential for managing high-volume candidate pipelines and building talent pools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
