I am writing to apply for the Traineeprogramm as IT-Trainer/Dozent at GFN GmbH. The opportunity to combine my technical background with teaching and guiding others through Microsoft certification paths is exactly the kind of career direction I want to pursue.

My technical experience spans full-stack development, server administration, and cloud infrastructure. I have worked extensively with Linux servers, Docker, Nginx, and Apache, and I have deployed and maintained applications on AWS and Google Cloud. I am comfortable with authentication systems, role-based access control, and secure API design, all of which relate directly to the Microsoft Windows Server, Microsoft 365, and Azure topics listed in your training curriculum.

Through my professional experience as a Web Developer, I have built and deployed production applications, managed databases, and set up CI/CD pipelines. I have also worked with real-time features using WebSockets and integrated third-party services. This hands-on technical background gives me a practical understanding of the systems and workflows that your future trainees will need to learn.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am motivated to become a trainer because I genuinely enjoy breaking down complex topics into clear, understandable steps. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to GFN’s training team.

Sincerely,

Md Shahanur Islam Shagor
