I am writing to apply for the Trainee COO Office & Operations position at ju:niz Energy GmbH. Your work in developing utility-scale battery storage solutions for the energy transition is both timely and impactful, and I am drawn to the opportunity to contribute to a growing organization driving real change in sustainable energy infrastructure.

Through my software engineering background, I have developed strong analytical thinking and the ability to break down complex problems into clear, actionable steps. I have experience preparing structured reports, tracking project milestones, and ensuring that cross-team communication remains organized and transparent. These skills translate directly to supporting a COO in operational and strategic tasks.

In previous roles, I worked closely with teams across development, delivery, and operations, coordinating tasks, documenting progress, and following up on open items until completion. I am comfortable preparing decision templates, status updates, and meeting materials that help leadership move quickly and with clarity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills, hands-on mentality, and interest in operations to ju:niz Energy. I have attached my CV for your review and would welcome the chance to discuss how I can support your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
