I am writing to apply for the Projekt- und Vertriebsingenieur (m/w/d) position at Timebridge GmbH. Your focus on expanding and developing extraction and filter technology in the Ulm area presents an interesting opportunity to apply my technical project management and client-facing skills in a new domain.

Through my professional experience as a Web Developer, I have developed strong capabilities in technical project planning, concept development, and customer communication. I have worked directly with clients to understand their requirements, develop tailored solutions, and deliver projects from initial planning through final deployment. This experience has given me a structured approach to project execution and the ability to communicate technical concepts clearly to both technical and non-technical stakeholders.

In previous work, I have been responsible for creating technical documentation, performing analysis, and collaborating with development teams to implement solutions. I am comfortable working independently, taking initiative, and managing multiple priorities simultaneously. My background in software engineering has also given me strong analytical and problem-solving skills that I can apply to understanding flow technology and system design.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and client-facing experience can contribute to your team at Timebridge GmbH.

Sincerely,

Md Shahanur Islam Shagor
