I am writing to apply for the Greenfield Recruiting Manager position at visionm GmbH. The opportunity to lead the full recruitment lifecycle for new operations centers and build a team from the ground up aligns with my experience in project coordination, stakeholder management, and process-driven work.

My background in software engineering has required me to manage complex projects end-to-end, from initial requirements gathering through to delivery. I have worked closely with project managers, business partners, and cross-functional teams to align technical solutions with business goals. This experience has given me a structured approach to planning, strong communication skills, and the ability to balance competing priorities.

In previous roles, I have taken ownership of project workflows, coordinated with multiple stakeholders, and ensured that deliverables met both quality standards and timelines. I am comfortable working independently, adapting to changing requirements, and maintaining clear documentation throughout the process. I also have experience using tools like Excel for data tracking and reporting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in contributing to a structured, process-oriented organization with long-term growth potential. I have attached my CV for your review and would welcome the opportunity to discuss how my background can support your team.

Sincerely,

Md Shahanur Islam Shagor
