I am writing to apply for the Personalsachbearbeiter/in Lohn- und Gehalt position at visionm GmbH. The role's focus on accuracy, process optimization, and working within an international environment aligns with my background in building reliable systems and collaborating across teams.

Although my professional experience is in software engineering, I have developed strong skills in data management, process automation, and maintaining data integrity. I have worked extensively with databases like MySQL and PostgreSQL, ensuring data accuracy and consistency. I am comfortable handling large datasets, creating reports, and following strict procedural guidelines. These skills are directly applicable to managing payroll data, maintaining digital personnel files, and ensuring compliance with regulations.

In my previous roles, I have been responsible for optimizing workflows, automating repetitive tasks, and improving system reliability. I approach work with a structured and independent mindset, paying close attention to detail. I am confident in my ability to learn new tools like SAP R/3 HR quickly and apply my analytical skills to ensure accurate and timely payroll processing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in joining visionm GmbH because of its international focus and stable, growth-oriented environment. I am eager to contribute to your team by bringing a solution-oriented approach and a commitment to accuracy. I have attached my CV for your review and welcome the opportunity to discuss how my skills can support your HR operations.

Sincerely,

Md Shahanur Islam Shagor
