I am writing to apply for the Nachwuchs- bzw. Traineeprogramm Kredit-Sachbearbeitung (Firmen-/Gewerbekunden) at Sparkasse Passau. Your structured development program, with rotations across commercial credit areas, is exactly the kind of hands-on training environment where I can build a strong foundation in banking and credit analysis.

While my background is in software engineering, I have developed a disciplined, analytical mindset through years of working with complex systems, data structures, and logical problem-solving. I am accustomed to evaluating information carefully, identifying patterns, and making sound decisions based on evidence. These skills translate directly to tasks like balance sheet analysis, credit rating, and investment assessment.

What stands out to me about this program is the emphasis on learning through real responsibility. I am not looking for a passive role. I want to work directly with customers, support investment decisions, and contribute to credit evaluations. I am prepared to take initiative, ask questions, and learn quickly from experienced colleagues.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my analytical skills, flexibility, and strong work ethic to Sparkasse Passau. I have attached my CV for your review and look forward to discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
