I am writing to apply for the Social Media Content Creator role at moveUP Media GmbH. Your focus on organic shortform content and building recognizable formats for brands on TikTok, Instagram, and YouTube is impressive. I am particularly interested in how your team combines creative storytelling with a pragmatic, high-output workflow.

While my professional background is in software engineering, I bring a complementary skill set that directly supports your nice-to-have requirements around AI workflows. Through hands-on project development, I have integrated AI APIs such as OpenAI and Replicate into production systems, building automated pipelines for content processing. This experience translates naturally to tasks like transcription, subtitle generation, and editing assistance automation.

I work in a structured manner, managing parallel deadlines and maintaining clear priorities. I am comfortable with a run-and-gun shooting style and am fully prepared to travel for on-location shoots and events. My technical background also means I can quickly adapt to new editing tools and workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
