I am writing to apply for the Referent Beschwerdemanagement position at GENO Broker. The role's focus on analyzing customer complaints, identifying recurring issues, and driving process improvements is something I find genuinely interesting.

In my professional experience as a software engineer, I have spent years diagnosing problems, tracing root causes, and coordinating with different teams to implement effective solutions. This systematic approach to problem-solving translates directly into complaint management: understanding the issue, evaluating it against requirements, and ensuring a complete resolution.

One area that particularly interests me is the emphasis on identifying patterns in complaints and using those insights to improve service quality. In my previous work, I regularly analyzed recurring issues, documented findings, and collaborated with stakeholders to optimize workflows. This experience has given me a practical, hands-on mindset for quality improvement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and process-oriented approach can contribute to the GENO Broker team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
