I am writing to apply for the Mitarbeiter Controlling (m/w/d) position at Manzke Gruppe. While my professional background is in software engineering, I bring strong analytical skills, structured thinking, and a track record of building systems that improve data quality and operational transparency.

Through my work developing web applications and real-time monitoring dashboards, I have gained practical experience in data analysis, reporting, and process optimization. I built a server health monitoring system that tracked availability and latency across multiple targets, streaming live metrics to a dashboard. This required careful attention to data accuracy, clear visualization, and reliable reporting.

In my professional experience, I have worked with databases including MySQL and PostgreSQL, designed efficient queries, and implemented caching strategies to improve performance. I also developed an AI-powered financial application that involved handling financial data, generating PDF reports, and automating document delivery. These projects required precision, structured workflows, and a focus on data integrity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, attention to detail, and experience with data-driven systems would allow me to contribute meaningfully to the controlling team at Manzke Gruppe. I have attached my CV for your review and welcome the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
