I am writing to apply for the Creative Concept & Copy position at MILES Mobility. Your mission to transform MILES from a mobility provider into a cultural anchor resonates with me. I have always believed that strong brands are built through consistent, thoughtful communication across every channel.

As a software engineer who has built and shipped multiple user-facing platforms, I understand that great copy is not just about wordsâ it is about how those words shape the entire user experience. In every project I have delivered, from travel booking systems to financial management tools, I have worked closely with design and product teams to ensure that the interface language, notifications, and CTAs all carry a consistent brand voice. I know that a well-written error message can be as important as a headline.

One area that particularly interests me is the challenge of scaling a brand's personality across different formats and platforms. In my work on the Travel Agency App, I helped create a multilingual, multi-currency platform where the tone had to remain warm and trustworthy whether the user was browsing on a desktop or receiving a push notification. This required thinking beyond just the visual design and considering how every piece of text contributed to the overall brand experience.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
