I am writing to apply for the Manager Operation Mechanik position at Sappi Ehingen GmbH. While my professional background is in software engineering and intelligent systems, I bring strong analytical capabilities, project management experience, and a structured approach to optimizing technical operations that I believe can contribute to your maintenance and reliability goals.

Through my work as a Web Developer, I have coordinated complex technical projects from requirements through deployment, working closely with stakeholders to ensure on-time delivery and measurable improvements. I am experienced in analyzing system performance data, identifying bottlenecks, and implementing optimizations that increase availability and efficiency. These skills translate directly to industrial maintenance environments where data-driven decisions and process improvements are essential.

One area that particularly interests me is the opportunity to apply my analytical and project coordination skills to mechanical maintenance operations. I have experience managing workflows, tracking KPIs, and ensuring compliance with technical standards. I am comfortable leading cross-functional efforts and communicating technical information clearly to both technical and non-technical team members.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and project management skills can support Sappi Ehingen’s maintenance operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
