I am writing to express my interest in future career opportunities at RACQ. Your organization's commitment to helping Queenslanders move and live safely, securely, and sustainably aligns with my own approach to building reliable, user-focused technology solutions.

As a Full-Stack Engineer with over four years of professional web development experience, I have worked extensively with Laravel, Next.js, React, and Node.js to build and maintain production applications. My work has involved designing RESTful APIs, implementing authentication and role-based access control, optimizing database queries, and creating responsive, SEO-friendly user interfaces. I am comfortable working across the entire stack, from backend logic to frontend presentation.

In my previous role at Explo-IT, I delivered features including real-time chat and notifications, payment gateway integration, and secure server deployment on Linux environments using Nginx and Docker. I also contributed to performance optimization through query tuning and caching strategies. At DataSoft LTD, I collaborated on Laravel-based web applications, API development, and responsive UI implementation using Tailwind CSS.

One area that particularly interests me is building systems that are both technically sound and genuinely useful for end users. My project work includes developing a multi-vendor e-commerce ecosystem with role-based access across web and mobile platforms, as well as a real-time server health monitoring dashboard using Socket.IO and Docker. These experiences have reinforced my ability to deliver scalable, maintainable solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills could contribute to RACQ's ongoing work. Thank you for considering my expression of interest.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
