I am writing to apply for the Grafikdesigner (m/w/d) - KI & Designautomatisierung position at Neolymp. Your goal of building an in-house graphic design capability for a growing Berlin-based fitness brand is an interesting challenge, and I am keen to contribute to this transition.

What stands out to me is the opportunity to combine AI-driven creative production with hands-on design work. My experience includes developing AI-powered applications that integrate OpenAI APIs and image processing tools, which directly relates to your need for KI-gestˆ…tzte Bild- und Creative-Produktion. I am comfortable working with new tools and methods, and I enjoy the process of turning briefings into finished visual packages.

Through my project work, I have built full-stack systems that required independent problem-solving and structured delivery. For example, I developed an AI-powered real estate platform where I integrated AI assistants for intelligent property analysis and used image processing APIs to enhance visual content. This experience taught me how to combine AI capabilities with practical, user-facing applications.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can bring a structured, independent working style to Neolymp and help build your internal creative production capability. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
