I am writing to apply for the Freelance Designer position at Img.creators. Your emphasis on core values and empowering individuals to excel aligns with how I approach my work.

Although my primary expertise is in software engineering, I have consistently worked at the intersection of development and design. Through my full-stack projects, I have built responsive, user-friendly interfaces using tools like Figma, Tailwind CSS, and MaterialUI. This experience has given me a practical understanding of UX design, layout, and visual consistency.

One area where I have applied design thinking is in the Travel Agency App, where I created the UI using Next.js, Tailwind CSS, and Google Maps integration. The project required careful attention to multi-language and multi-currency support, ensuring a seamless experience for international users. I also designed the dashboard layouts for the Newsroom Management system, focusing on clarity and efficient content workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. Thank you for considering my application, and I would welcome the opportunity to discuss how I can contribute to your creative projects.

Sincerely,

Md Shahanur Islam Shagor
