I am writing to apply for the Job Title position at QB Corporation. With a background in full-stack development and a focus on building practical, scalable systems, I am confident I can contribute effectively to your team.

My professional experience spans web application development using Laravel, Next.js, React, and Node.js. I have built and integrated RESTful APIs, implemented secure authentication and role-based access control, and worked extensively with MySQL and PostgreSQL databases. These technologies form the core of my day-to-day development work.

In previous work at Explo-IT, I delivered full-stack applications from concept to deployment. This included building responsive, SEO-friendly interfaces with Next.js and Tailwind CSS, optimizing database queries for performance, and deploying applications on Linux servers using Docker and Nginx with CI/CD pipelines. I also integrated real-time features using WebSockets and third-party services such as payment gateways and cloud storage.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
