I am writing to apply for the Customer Service Assistant position at ICAPE GROUP. Your company's role as a European leader in custom-made technical parts and electro-mechanical components, serving over 3,650 customers globally, is impressive. I am interested in contributing to your team's service excellence and international reach.

Through my work as a software engineer, I have developed strong organizational and coordination skills. I have experience acting as a coordination point between customers, internal teams, and external partners to ensure smooth project delivery. This background has taught me to maintain accurate records, follow processes carefully, and communicate clearly with diverse stakeholders.

One area where I can contribute is in supporting customer relationships and administrative tasks. I am comfortable processing orders, maintaining documentation, and assisting with process improvements. My analytical mindset helps me identify inefficiencies and suggest practical solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am organized, detail-oriented, and comfortable working remotely. I am eager to bring my coordination skills and proactive attitude to support CIPEM's customer service operations. I have attached my CV for your review and look forward to discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
