I am writing to apply for the Senior Platform Engineer - Contact Centre role at SumUp. The opportunity to own the technical direction of a global contact centre platform and drive its evolution toward AI-powered support aligns directly with the kind of work I enjoy most: building practical, scalable systems that solve real operational problems.

What stands out to me about SumUp is the scale and impact of the work. Supporting over 4 million merchants across 37 markets means the contact centre platform must be reliable, adaptable, and continuously improving. The focus on moving toward conversational AI agents, intelligent routing, and real-time agent assistance reflects a practical approach to technology that I find compelling.

Through my professional experience as a Web Developer, I have built and integrated RESTful APIs, implemented real-time features using WebSockets, and deployed applications on Linux servers with Docker and Nginx. I have worked with JavaScript extensively across both frontend and backend systems, and I am comfortable in distributed environments that require clear API contracts and reliable data flow.

On the AI side, I have developed AI-powered features using OpenAI and Replicate APIs, including training custom AI assistants and integrating image processing pipelines. I have also built real-time server monitoring dashboards using Socket.IO and Python-based health tracking, which required designing systems that push live data efficiently to connected clients. These experiences have given me a practical understanding of how to apply AI tools and automation frameworks in production support contexts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to SumUp’s contact centre platform.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
