I am writing to apply for the Senior Enterprise Sales Manager, Wolt for Work position at Wolt. Your mission to bring the same great user experience Wolt is known for to business users around the world is something I find genuinely compelling. The opportunity to own the full sales cycle and drive growth in a rapidly-scaling B2B environment aligns well with my professional approach.

While my core expertise is in software engineering, I have consistently operated with an entrepreneurial, ownership-driven mindset across every project I have delivered. At Explo-IT, I worked directly with stakeholders to understand their needs, formulate solutions, and ensure successful delivery. This required structured problem-solving, clear communication, and the ability to manage competing priorities. I am comfortable taking full responsibility for outcomes and working across teams to get things done.

One area that particularly interests me is the full end-to-end ownership of the acquisition funnel described in this role. In my previous work, I managed product delivery from initial requirement gathering through deployment and client handoff. I learned to balance technical constraints with business goals, negotiate priorities, and maintain clear documentation throughout the process. I approach problems analytically but act decisively when needed.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in owning complex delivery cycles and solving client problems can contribute to the growth of Wolt for Work.

Sincerely,

Md Shahanur Islam Shagor
