I am writing to apply for the ECommerce Strategist (m/w/d) Direct Response position at RealStudio GmbH. Your work as a growth partner for over 100 top German B2C brands like AG1, AirUp, and Smilodox is impressive, and I am interested in contributing to your creative strategy and campaign development.

My professional experience spans full-stack web development and AI integration, where I have built scalable platforms that combine clean frontend interfaces with robust backend systems. I have worked with technologies such as Laravel, Next.js, React, and Node.js to deliver production-ready applications that support business growth and user engagement.

In previous roles, I developed and maintained RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I also built responsive, SEO-friendly UIs using Tailwind CSS and modern JavaScript frameworks. These skills directly support the creation of effective digital campaigns and asset optimization.

One area that particularly interests me is the ability to analyze KPIs and continuously improve assets based on performance data. I have experience working with real-time metrics and iterating on features to enhance user experience and conversion. I am comfortable collaborating closely with founders and teams to align technical execution with strategic goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can support RealStudio GmbH’s creative strategy and brand growth.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
