I am writing to apply for the Doku-Autor:in / Recherche & Skript position at TˆglichTechnik. Your approach to tech storytelling â taking complex systems apart and making invisible mechanisms tangible â is exactly the kind of work I enjoy doing.

What stands out to me about TˆglichTechnik is the focus on substance over spectacle. No tutorials, no marketing fluff, just honest, well-researched documentaries that respect the viewer’s intelligence. That philosophy aligns with how I think and write.

Through my work as a software engineer, I have spent years researching and understanding complex technical systems â from AI-powered applications and real-time communication engines to autonomous drone networks and privacy-preserving blockchain frameworks. Breaking down these systems into clear, simple explanations has been a natural part of my daily work. I know how to find reliable sources, dig into unexpected details, and structure information so it makes sense to people who are not specialists.

I also understand the mechanics of YouTube content. I know what a hook does, how pacing affects retention, and why every sentence needs to earn its place. When I write, I think in short, rhythmic sentences with concrete images. I avoid jargon and empty phrases. I also consider how the script could be visualized, because good storytelling on YouTube is as much about structure as it is about words.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would be happy to send a writing sample as requested.

Sincerely,

Md Shahanur Islam Shagor
