I am writing to apply for the Product Line Manager Defense Applications position at CONCAPE. The role's focus on end-to-end product ownership in the defense segment, combined with the opportunity to work at the intersection of engineering, commercial strategy, and key account management, aligns directly with my technical background and career direction.

My work has centered on building secure, resilient systems for defense and autonomous applications. I developed a Privacy-Preserving Blockchain Framework for Autonomous Vehicles (OmniGuard V2X), which integrates blockchain, Zero-Knowledge Proofs, and post-quantum cryptography to protect Vehicle-to-Everything (V2X) communication. This project required defining technical requirements, coordinating with research objectives, and ensuring the system met both security and performance targets. I also built a Wireless Vision-Aid for the Blind (WVAB), a real-time assistive system using YOLOv8n object detection and low-latency UDP streaming, demonstrating my ability to take a product from concept to deployment.

In my professional experience as a Web Developer, I have taken full ownership of product lifecycles, from defining specifications based on customer and R&D input to driving launches and monitoring performance. I have collaborated cross-functionally with engineering, marketing, and senior stakeholders to align product strategies with business objectives. This has given me a practical understanding of pricing decisions, cost control, and profitability management within matrix organizations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in defense-related systems and product lifecycle management can contribute to CONCAPE's growth in the defense segment.

Sincerely,

Md Shahanur Islam Shagor
