I am writing to apply for the Leiter Technik / Technischer Standortleiter position at CONCAPE, supporting the recruitment for a traditional family-owned production company in the FMCG sector in the Lake Constance region.

Through my professional experience, I have developed a strong foundation in Linux server administration, Docker containerization, and Nginx configuration. I have deployed and maintained production applications, managed CI/CD pipelines, and implemented monitoring systems using Prometheus and Grafana. These skills align well with the technical ownership and preventive maintenance responsibilities of this role.

One area that particularly interests me is the opportunity to build and implement a Preventive-Maintenance strategy across multiple sites. In previous work, I have managed server health monitoring systems that tracked availability, latency, and system metrics in real time. I am comfortable with the hands-on, shopfloor-oriented approach required to maintain production reliability and drive continuous improvement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my technical background can contribute to the operational excellence of your production sites.

Sincerely,

Md Shahanur Islam Shagor
