I am writing to apply for the Controller (m/w/d) position at MY Humancapital GmbH. While my professional background is in software engineering, I bring strong analytical skills, process-oriented thinking, and experience working with data systems that are directly relevant to this role.

Through my work as a web developer, I have built and maintained data-driven applications using MySQL and PostgreSQL. This involved designing database schemas, writing complex queries, and generating reports to support business decisions. I am comfortable working with large datasets and ensuring data integrity.

One area that particularly interests me is the opportunity to apply my analytical mindset to financial planning and control. In my previous roles, I regularly analyzed system performance, identified bottlenecks, and implemented process improvements. I am confident these skills transfer well to budgeting, forecasting, and reporting responsibilities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical abilities and structured approach to this role. I have attached my CV for your review and look forward to discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
