I am writing to apply for the Werkstudent (m/w/d) Marketing position at codemanufaktur GmbH. The opportunity to contribute to content creation, website management, and marketing strategy while studying aligns well with my technical background and hands-on project experience.

My work has involved building and maintaining websites and landing pages using Next.js, React, and Tailwind CSS. I have experience creating structured content, managing site updates, and ensuring responsive, user-friendly interfaces. These skills directly support the content creation and website maintenance responsibilities outlined in this role.

I have worked with AI tools in several projects, integrating OpenAI APIs for intelligent assistants and using Replicate for image processing. This experience gives me a practical understanding of how AI can enhance content workflows and marketing automation. I am comfortable exploring new tools and applying them to real-world tasks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently studying Software Engineering and looking for a practical opportunity to apply my skills in a marketing context. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
