I am writing to apply for the Junior Marketing Manager position at Omnora GmbH. Your mission to help companies like DB, AOK, and ADAC secure and structure their knowledge using AI is genuinely interesting. I am drawn to the combination of technology, automation, and ownership that this role offers.

My background is in software engineering, with a strong focus on building AI-powered applications and automation systems. I have developed full-stack platforms that integrate AI assistants, process data intelligently, and automate repetitive tasks. This experience has given me a practical understanding of how AI tools can be applied to real-world problems, including content production, data analysis, and workflow automation.

One area that particularly interests me is the emphasis on data-driven decision-making and building scalable marketing infrastructure. In my projects, I have worked extensively with dashboards, KPIs, and real-time monitoring systems. I am comfortable interpreting data, identifying patterns, and using those insights to guide optimization. I also have experience with design tools and creating user interfaces that are both functional and visually appealing.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take ownership, learn quickly, and make a tangible impact. Omnora’s startup environment and the opportunity to shape the marketing function from an early stage are exactly the kind of challenge I want. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
