I am writing to apply for the IT Projektmanager Software Implementierung position at MY Humancapital GmbH. The role involves leading international customer projects for software implementation in maintenance and fleet management, coordinating between clients, internal departments, and external service providers. My background in full-stack development and project coordination aligns well with the technical and organizational demands of this position.

Through my professional experience as a Web Developer, I have developed a solid understanding of software architectures, APIs, and development workflows. I have worked extensively with Laravel, Next.js, Node.js, and MySQL, building and integrating RESTful APIs for seamless data exchange between frontend and backend systems. This technical foundation allows me to confidently steer technical service providers and translate customer requirements into structured technical specifications and work packages.

In previous roles, I was responsible for delivering full-stack projects end to end. This included capturing and analyzing client requirements, defining project milestones, coordinating with stakeholders, and ensuring transparent communication throughout the delivery cycle. I have experience managing multiple work streams simultaneously, performing risk assessments, and adjusting plans when deviations occurred. These responsibilities closely mirror the project controlling and stakeholder reporting tasks described in the job description.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical project management experience can contribute to your partner company’s software implementation projects in Munich.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
