I am writing to apply for the Freelance Designer role at Haus. Your studio's focus on blending creativity with technology aligns with how I approach design and development.

Through hands-on project work, I have built a strong foundation in typography, layout, and visual communication. I use Figma regularly for wireframing and prototyping, and I bring an understanding of how UI, motion, and interaction shape user experiences. My background in frontend development gives me practical insight into how designs translate into working digital products.

One area that particularly interests me is contributing to moodboards, style frames, and exploratory concepting. In previous work on web applications, I collaborated closely with teams to refine visual concepts and deliver production-ready assets. I am comfortable iterating based on feedback and pushing creative work forward alongside Art Directors and Senior Designers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Haus's upcoming projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
