I am writing to apply for the Business Administration position at Brainkind. While my background is primarily technical, I have consistently taken on organizational and coordination responsibilities in my development work, which has given me practical experience in administration, workflow management, and cross-team communication.

In my role as a Web Developer, I managed project delivery timelines, coordinated with stakeholders, and ensured smooth communication between development teams and business units. I handled task prioritization, documentation, and deployment planning, which required strong organizational skills and attention to detail.

One area that particularly interests me is the intersection of technology and administration. I have experience managing multi-module platforms, overseeing data flow between systems, and maintaining clear documentation for both technical and non-technical audiences. These responsibilities have prepared me to handle administrative tasks efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my organizational and coordination skills can contribute to Brainkind’s operations.

Sincerely,

Md Shahanur Islam Shagor
