I am writing to apply for the Director of Service position at Marchay. Marchay's model of delivering curated, high-touch travel experiences to sophisticated members is impressive, and I am drawn to the challenge of leading a service team that defines excellence in luxury hospitality.

Although my professional background is in software engineering rather than luxury travel, I bring transferable strengths in team coordination, process design, and client-focused delivery. In my work as a Web Developer, I have collaborated closely with stakeholders, managed project timelines, and ensured that end-user needs are met with consistency and quality. These experiences have built a practical understanding of service standards, escalation handling, and cross-functional teamwork.

One area that particularly interests me is the emphasis on training, mentorship, and performance management within the Service team. I have experience mentoring junior developers and contributing to team knowledge-sharing sessions. I am comfortable defining clear roles, supporting career development, and creating structures that help teams perform consistently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Marchay's service team and member experience.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
