I am writing to apply for the Pengajar Biologi Online position at Ruangguru for Business. While my professional background is in software engineering, I have developed strong communication and teaching abilities through years of explaining complex technical concepts to diverse audiences.

Ruangguru's mission to make quality education accessible across Indonesia is something I genuinely admire. The platform's reach and impact on students from various backgrounds align with my interest in using technology to create meaningful real-world change.

Through my experience as a web developer, I have worked closely with cross-functional teams, mentored junior developers, and presented technical solutions to non-technical stakeholders. These experiences have sharpened my ability to break down complex topics into clear, understandable explanations, which I believe is essential for effective online teaching.

I am comfortable teaching online, proficient with Google Meet and Zoom, and have the necessary equipment including a laptop, headphone, and stable internet connection. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in multicultural environments.

I am eager to bring my communication skills, adaptability, and enthusiasm for education to the Ruangguru team. I have attached my CV for your review and look forward to the opportunity to contribute to your mission.

Sincerely,

Md Shahanur Islam Shagor
