I am writing to apply for the Customer Support Vergabepilot AI (Minijob) position at ciconia Systems GmbH. Your platform helps companies navigate public procurement in Germany using AI, and I find the combination of GovTech, AI, and practical user support genuinely interesting.

As a Full-Stack and AI Engineer, I have developed a strong technical understanding of software products and how they work under the hood. I am comfortable navigating complex systems, identifying issues, and communicating clearly with both users and development teams. This technical foundation allows me to quickly learn new tools and handle support tickets with precision.

In previous work, I have managed bug tracking, documentation, and user-facing communication. I am experienced in taking detailed bug reports, reproducing issues, and forwarding them to the right team members. I also have experience with administrative workflows, including managing user data and handling recurring tasks in a structured way.

I work well independently and take ownership of my responsibilities. I am fluent in German and English, and I enjoy helping people solve problems in a clear and friendly manner. The remote and flexible nature of this role fits well with how I work best.

I have attached my CV for your review. I would be happy to discuss how I can support your team and your users.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
