I am writing to apply for the SAP HCM Payroll Consultant role at j&s-soft AG. Your focus on combining SAP expertise with practical, customer-oriented solutions and your openness to supporting individual growth caught my attention.

My background is in software engineering, with strong technical skills in system configuration, database management, and API integration. I have worked with MySQL, PostgreSQL, and Linux server environments, and I understand how to build and maintain reliable, well-structured systems that support business operations.

In my professional experience, I have collaborated closely with stakeholders to analyze requirements, optimize processes, and implement custom solutions. I am comfortable working independently and enjoy being part of a team where knowledge sharing and practical problem-solving are valued.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and problem-solving approach could contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
