I am writing to apply for the Senior SAP MM Berater position at Wavestone Germany AG. Your focus on S/4HANA transformation and material requirements planning within a complex maintenance landscape is an area where I can contribute effectively.

Through my professional experience as a Web Developer, I have worked extensively with backend systems, API development, and database management. I have built and integrated RESTful APIs using Laravel and Node.js, managed MySQL and PostgreSQL databases, and implemented role-based access control and authentication systems. These skills directly support the technical requirements of customizing SAP MM components and managing interfaces between systems.

One area that particularly interests me is the integration of different systems and ensuring stable data flows. In my previous work, I developed and maintained interfaces between frontend and backend systems, optimized database queries for performance, and ensured reliable data exchange. This experience aligns well with the responsibility of managing interfaces between SAP MM, PP, PM, and BW systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support your S/4HANA transformation projects.

Sincerely,

Md Shahanur Islam Shagor
