I am writing to apply for the E-Mail Marketing / CRM Manager position at RealStudio GmbH. Your work as a growth partner for over 100 major German B2C brands is impressive, and I am interested in contributing to the strategic development of CRM processes for your clients.

My professional experience has been in full-stack web development, where I have built and maintained scalable platforms for e-commerce and business operations. I have worked with Laravel, Next.js, React, and MySQL to deliver features including user authentication, payment integration, and real-time data handling. This technical foundation gives me a practical understanding of how CRM systems function, how data flows between frontend and backend, and how to optimize assets for performance and user engagement.

In previous roles, I collaborated directly with stakeholders and founders to understand business goals, analyze KPIs, and implement improvements. I am comfortable working with data, identifying trends, and making decisions that improve both user experience and operational efficiency. I also have experience deploying and maintaining applications on Linux servers with Docker and Nginx, which supports reliable system operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
