I am writing to apply for the Senior Manager - MDM Technology & Governance position at EVIDENT Europe GmbH. While my professional background is in software engineering and full-stack development, I bring a strong technical foundation in data architecture, system integration, and cross-functional project delivery that aligns with the core responsibilities of this role.

Through my work as a Web Developer, I have designed and built scalable applications using Laravel, Node.js, and Next.js, working extensively with MySQL and PostgreSQL databases. I have implemented authentication systems, role-based access control, and RESTful APIs, and have managed deployments on Linux servers with Docker, Nginx, and CI/CD pipelines. This experience has given me a practical understanding of enterprise data flows, system integration, and the importance of data quality and governance.

One area that particularly interests me is the challenge of enforcing data standards and driving alignment across business units. In my projects, I have collaborated closely with stakeholders to translate business requirements into technical solutions, ensuring that systems are built for scalability, reliability, and maintainability. I am comfortable working in cross-functional environments and have experience managing vendor deliverables and external consultants.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
