I am writing to apply for the IT Support Mitarbeiter (m/w/d) position with the partner company in Augsburg. Your description of a service-oriented role focused on user support, ticket management, and technical problem-solving aligns well with my practical experience in IT systems and user assistance.

Through my work as a web developer, I have developed strong technical troubleshooting skills. I have configured and maintained Linux servers, managed Nginx and Apache web servers, and worked with Docker containers. These responsibilities required diagnosing issues, testing solutions, and ensuring systems remained stable and available for users.

One area that particularly interests me is supporting users with digital services and secure access. I have experience setting up authentication systems, managing user accounts, and configuring secure connections. I am comfortable explaining technical concepts in simple terms and guiding users through step-by-step solutions.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I am currently learning German and committed to improving my language skills for this role.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical and support experience can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
