I am writing to apply for the Performance Marketing Manager B2B position at Leadeffect GmbH. Your focus on supporting IT companies with online marketing across web design, SEO, SEA, LinkedIn, and email marketing is interesting. I am a Full-Stack & AI Engineer with strong technical skills and a data-driven approach that aligns well with the strategic and performance-oriented nature of this role.

My technical background provides a solid foundation for the responsibilities outlined in this position. Through my professional experience as a Web Developer, I have built and optimized web applications using Laravel, Next.js, React, and Node.js. This hands-on development work gives me a deep understanding of website architecture, user behavior, and conversion tracking. I am comfortable working with Google Tag Manager and Analytics to create tracking concepts and generate reports, as I have integrated various third-party services and analytics tools into the applications I have developed.

One area that particularly interests me is the conversion optimization aspect of this role. In my previous work, I have designed and developed responsive, SEO-friendly user interfaces and implemented real-time features. This experience has given me practical insight into how user funnel optimization works from a technical perspective. I understand how landing page design, user flow, and website performance directly impact conversion rates, and I am confident in my ability to contribute to the conceptual optimization of user funnels.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am a quick learner with a proactive and analytical mindset, and I am ready to take ownership of campaigns at the channel level.

I am available to start immediately and can work 20+ hours per week in the CET time zone. I have attached my CV for your review and look forward to discussing how my technical background and analytical approach can contribute to the success of your clients.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
