I am writing to apply for the Marketing Manager im B2B Online-Marketing position at Leadeffect GmbH. Your work supporting over 70 IT companies across web design, SEO, SEA, LinkedIn, and email marketing is impressive, and I appreciate the focus on data-driven, performance-oriented campaign management.

While my professional background is in software engineering rather than traditional marketing, I bring strong IT affinity, analytical thinking, and hands-on experience with digital tools and platforms. I have worked extensively with web technologies, analytics, and conversion optimization from a technical perspective. This gives me a solid foundation for understanding how tracking, user behavior, and funnel optimization work in practice.

Through my work as a Web Developer, I have built and maintained web applications, integrated analytics and tracking solutions, and optimized user interfaces for better engagement. I am comfortable working with data, creating reports, and collaborating with project managers and clients. My technical background allows me to quickly understand new tools and platforms, which aligns well with your need for someone who can manage campaigns across Google Ads, LinkedIn, and email outreach.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also eager to improve my German and would welcome the opportunity to take the course you offer.

I am available to start as soon as possible and can work 20+ hours per week in the CET timezone. I have attached my CV for your review and look forward to hearing from you.

Sincerely,

Md Shahanur Islam Shagor
