I am writing to apply for the LinkedIn & Google Ads Manager role at Leadeffect GmbH. Your focus on supporting IT companies with web design, SEO, SEA, and email marketing aligns with my technical background and interest in data-driven digital strategies.

Although my professional experience is rooted in software engineering, I bring strong IT affinity, analytical thinking, and hands-on experience with digital tools. I have worked extensively with web technologies, databases, and reporting systems, which gives me a practical understanding of how conversion tracking, user behavior analysis, and campaign optimization work from a technical perspective.

In previous work, I have built and maintained web applications where I analyzed user interactions, optimized landing pages for better conversion, and created reports to track performance. I am comfortable working with analytics tools, setting up tracking concepts, and using data to make informed decisions. My experience with Linux, Docker, and cloud platforms also means I can quickly understand the technical infrastructure behind marketing campaigns.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available to start as soon as possible and can work 20+ hours per week in the CET time zone. I have attached my CV for your review and look forward to discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
